infrastructure or for extending an existing wired network. The AG-5000 series has user selectable bandwidths up to 20 Mbps. These systems provide wireless connectivity to a wide variety of IP cameras, Video Servers (NVR's) and DVR's.

The AG-6000 series of Wireless Ethernet systems are designed for use in a wide variety of security applications creating a wireless backbone infrastructure or for extending an existing wired network. The AG-6000 operates in the 4.8-6.0 GHz which also includes the 4.9 GHz Public Safety Band. With user selectable bandwidths up to 40 Mbps, these systems can accommodate a variety of spectrum needs of authorized users in these bands and can operate over distances in excess of 25 miles.

Applications for both the AG-5000 Series and the AG-6000 Series include:

- CCTV and Security Surveillance
- Homeland Security
- Law Enforcement
- Military

AG-5000 Series

- Delivers fast wireless performance in dual (5.3/5.8GHz) license free U-NII bands.
- Operation modes include: Point-to-Point; Point-to Multipoint Systems; Access Point to create a Wireless LAN; AP Repeater - Wireless Extension of Range and Coverage; WDS with AP - Bridge with Wireless LAN
- Provides maximum wireless security by supporting WPA (Wi-Fi Protected Access); Three levels of WEP Encryption.

Network Administrations can manage the AG-5000 settings via its Web-based configuration utility or through Telnet.
